### Abstract of JP2001028620

**PROBLEM TO BE SOLVED:** To improve convenience in use by carrying a portable telephone set on a wrist and using the portable telephone set or PHS as-fitted on the wrist like a wrist watch in the case of carrying and using the portable telephone set.

**SOLUTION:** A portable telephone set of a wrist watch type is fitted to the inside of a wrist with a band and at the time of using, a power source switch H is pressed to turn on a power source and a cover is opened toward a palm to input a telephone number with the control keys I of a main body. The number is displayed on a liquid crystal screen C. When an opposite party answers, a speaker F fixed on the rear side of a cover D is fitted to a user's ear during speaking, thereby a microphone G fixed on the lower side of the main body picks up voice and the opposite party can hear it. The voice of the opposed party can be heard from the speaker F. Since the portable telephone set can be used as-fitted to the user's wrist, it can be used quickly at anytime and eliminate inconvenience of dropping it from the hand or looking for it in a bag. In addition, it is also possible to use the Internet, etc.
